ADMIT 365

Admit365 is an off-the-shelf Windows-based software solution for downtime patient admittance administration. The built-in Virtual Form Designer gives hospital IT's the ability to quickly create the desired print formats for their patient wristbands and labels. Patient data is encrypted and is only accessible under administrator password control and can be securely exported to the hospital's HIS via Excel file format.

Admit365 is capable of creating multiple custom forms in minutes. Data Entry fields can be inserted and resized at 0, 90, 180 and 270 degrees orientation. Multiple 1D and 2D barcodes can be easily assigned to each data entry field. Various security filters can be assigned to each data entry field to ensure against operator erroneous data entries. Graphical logos can be resized and inserted in the label or armbands.

Programmable data entry fields	Box draw tools
Radio buttons entry fields	Current date stamp
Stactitles and headers	Graphical logos
