

## BADGE ISSUANCE REIMAGINED

Why should you choose between gorgeous, high-quality physical IDs or the convenience of virtual badges? Get the best of both worlds with BadgeHub.

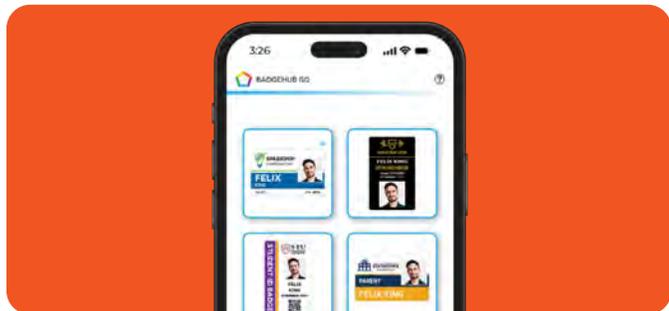

Gone are the days of antiquated badging set-ups limited to a single workstation in your organization. Design your workflow and issuance process to meet your needs - whatever they may be. Create an unlimited number of badges and easily issue from any device, including your phone or tablet. Print physical cards with one of our industry-leading direct-to-card printers or issue virtual badges automatically to a cardholder's phone. The process couldn't be easier!

### SECURE BADGE ACTIVATION

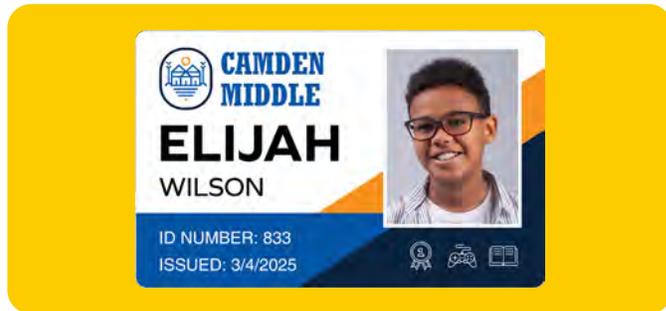

When new badges are issued to cardholders, we ensure they are automatically activated for immediate use in BadgeHub and any connected third-party system.

For facilities issuing virtual badges, those badges can be instantly removed from the BadgeHub GO App as soon as a badge or user is deactivated in the system, ensuring nobody can present a virtual badge who should not have one.

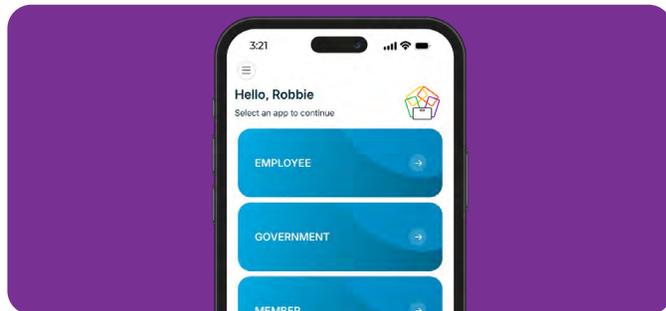

### VIRTUAL BADGES - FOR EVERYWHERE YOU GO

The BadgeHub GO Application enables cardholders to securely store multiple virtual badges from numerous organizations. Any facility using BadgeHub can issue virtual badges to a BadgeHub GO account, allowing cardholders to seamlessly rotate between badges as needed throughout their day.

### THE VALUE OF YOUR BADGE

We understand the value of using people's names in everyday interactions. Wearing and displaying customized ID badges helps foster community in any organization and makes it easier for cardholders to connect with and recognize one another by name throughout the day.

### DO MORE WITH YOUR BADGE

BadgeHub is more than just an issuance platform. Manage activities, like electronic door access, easily within the system. Add readers or wireless locks to openings within your building that require additional security or an audit trail of events. Our easy-to-manage reader profiles include holiday options and custom scheduling, letting you control who can access each opening and when.

## BADGEHUB FEATURES & BENEFITS:

- App available to download on the App Store and the Microsoft Store
- Compatible with Apple or Microsoft devices, including phones and tablets
- Native app experience eliminates browser-based issues
- Customize the app to your desired workflow and process
- Capture images remotely from any device within the App
- Import data fields, including cardholder information, list fields and more
- Ability to create conditional issuance rules for badge production
- Issue a virtual BadgeHub GO badge to iOS and Android devices
- Activate and deactivate both physical and virtual badges
- Unlimited badge design capabilities
- User-specified language: English and Spanish available
- Add unlimited entities and custom data fields
- Export cardholder data as a .csv and export cardholder photos

## DATA AND APP SECURITY:

- Continuous app updates available automatically
- Data securely hosted in Microsoft Azure cloud
- Azure Active Directory integration for additional security

## ADVANCED PRINTER INTEGRATION (CONNECT CARD PRINTER LINE / HALO CARD PRINTER):

- Allows for remote configuration, monitoring and troubleshooting of connected printer(s)
- No printer driver install required
- View card count and remaining ribbon availability from anywhere
- Remotely reboot the printer or print test cards
- Intuitive LCD screen makes it easy to run cleaning cards or troubleshoot issues
- Single and dual-sided print available
- Encoding options include magnetic stripe and smartcard enrollment

## AUTOMATED BILLING:

- Pricing based on number of cardholders in system
- Process payments automatically via credit card or ACH or receive an invoice
